UniFi® Network

Next-generation Gateway Pro

Dual-WAN security gateway designed to protect medium to large-sized networks with enterprise-class firewall configuration and threat management features.

The UniFi Next-generation Gateway Pro (UXG Pro) is a powerful security gateway that delivers a versatile networking interface and enterprise-class threat management functionality to medium to large-sized networks. The UXG Pro is equipped with (2) WAN ports (GbE RJ45 and 10G SFP+) that provide failover support, as well as (2) LAN ports (GbE RJ45 and 10G SFP+) to provide the high-speed connectivity needed to support the most bandwidth-intensive applications. It also excels as a complete network security solution, offering a full suite of threat mitigation features, including deep packet inspection (DPI), intrusion detection and prevention systems (IDS/IPS), and layered firewall configuration. The UXG Pro can be paired with a Cloud Key Gen2 Plus to create a highly powerful and secure deployment that can be fully managed with the UniFi Network application.
